

THE CLERE SCHOOL GEOGRAPHY LEARNING JOURNEY

CHANGING ECONOMIC WORLD CHALLENGE OF NATURAL HAZARDS ISSUE EVALUATION REVISION

Global variations in economic development and quality of life.
Reducing the global development gap.
Global variations in economic development and quality of life.

Risks to people and property.
Natural Hazards physical processes.
Effects and Response to Hazards
UK Weather Hazards
Climate change

The shape of rivers and changes downstream.
Fluvial landforms
Management strategies to protect river landscapes from the effects of flooding.

COASTS AND FIELDWORK LIVING WORLD RESOURCE MANAGEMENT UK LANDSCAPES RIVERS URBAN CHALLENGES

The coast is shaped by a number of physical processes.
Distinctive coastal landforms are the result of rock type, structure and physical processes.
Different management strategies can be used to protect coastlines from the effects of physical processes

Living and Non living components.
Global atmospheric circulation
Tropical rainforests environmental characteristics.
Deforestation
Sustainable Management
Hot deserts

The global distribution of food, water and energy resources is uneven
Demand and Provision in UK
Strategies to manage supply and demand

Opportunities and challenges from urban growth.
Urban change in cities
Urban sustainability

YEAR 10 & 11

URBANISATION INDIA COASTS AND FIELDWORK

What is Urbanisation?
Why is Urban change happening?
What are the impacts of Urban Change?

To explore the social, environmental and cultural factors within India
To consider how Urbanisation is impacting on people's lives
To understand India's relationship with the rest of the world

To consider the dynamic nature of coastlines.
To explore key coastal processes such as erosion and deposition.
To understand what can be done to protect coastlines from erosion

HAZARDS CLIMATE CHANGE ECOSYSTEMS

To know what Tectonics are?
What are Tectonic Hazards?
What the are impacts of Tectonic Hazards?
Example of Tectonic disasters

What are the causes of Climate Change?
What are the impacts of Climate Change?
What can we do about Climate Change?

Identify what Ecosystems are
Explore the worlds Rainforests
Understand the importance of Rainforests
Consider the threats to the Rainforest

YEAR 9

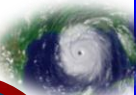

MIDDLE EAST POPULATION RIVERS AND FIELDWORK

What is life like in the Middle East?
People of the Middle East
How are we connected to the Middle East?

To explore why the world's population is growing
What is the impact of the growing population
What are the impacts of an Ageing population in the UK?

Why are rivers important?
What are the different courses of the river?
How can we investigate the features of a river?

DESERTS SUSTAINABILITY CLIMATIC HAZARDS

Where are the world's deserts located?
What are the conditions like in the desert?
How can deserts be used?

What is sustainability?
How can countries be more sustainable?
How can individuals be more sustainable?

Droughts and Tropical Storms
Why and where do they happen?
Impact of Droughts and Tropical Storms

YEAR 8

RUSSIA RESOURCE MANAGEMENT MARINE ENVIRONMENTS

Where is Russia?
Biomes of Russia
People of Russia
Environment of Russia

Importance of natural resources
Challenges faced with:
Water, Energy and Food

Importance of Oceans
Management of Coral Reefs
Damage to our oceans

WEATHER SYSTEMS THE UK INTRODUCTION TO GEOGRAPHY

What is weather and climate?
How can we measure the weather?
Local and Global weather features

Where are we in the UK?
What is our local area like?
What are the features of where we live?

What is Geography?
Being a global Citizen
Introduction to fieldwork

YEAR 7
